STATISTICS FOR LICENSING AND ENFORCEMENT FOR 2021

* Other inspections include occasions where premises were visited for purposes of inspection and could have been found closed, not operating, or the supervisor was unavailable or any instance where the routine comprehensive inspection was not conducted

Trends

The number of inspections conducted throughout the year was generally reduced due to Covid-19 induced lockdown and staff attrition. The peak number of inspections for pharmacies was observed in February. Targets were met for Public Institutions to fully support post marketing surveillance and sampling. Of particular note is the peak number of VMGDs which were inspected during the month of April. The general trend for inspection of all the other premises remained the same throughout the year.

STATISTICS FOR LICENSING AND ENFORCEMENT FOR 2021

Trends

There was a generally normal distribution for all the administrative activities processed throughout the year. This was characterized by decreased activities during the start and end of year 2021, with the peak number of permits, section 75 and consignments cleared observed during mid-year.
